**Subject:** RE: Trip to Gold King

Thanks everyone for your insights and advice on privacy, access, and enforcement sensitivities.

Our primarily focus for the press kit photo shoot remains the over-winter treatment plant. However, after speaking with each of you, we'll also try to take some images (from afar) of the surrounding terrain and (from afar) some of the nearby mine adits, etc.

We do NOT plan to travel to any of the actual adits *unless* one of you feels these images could be useful *and* road conditions are safe, e.g., if you think we need updated pictures of the adit, we'll talk with Hays about going up there, but will defer to his judgment as to whether or not it's safe to do so.

[Nancy: We're especially interested in what images the media have been requesting.]

Suzanne is also sending me a description of the Bastille mine along with some images so we don't inadvertently access that property or take any images of it.

If anyone thinks of anything else that needs to be on our radar screen, please feel free to give me a call on one of my cells: 202-360-8453 (work) and [Personal Phone/Ex. 6](personal).

Also, if there is anything in particular you think would be particularly good for us to document, we welcome those suggestions! While our initial goal was solely to provide images to the media over the winter. However, if there are any images that would be particularly useful for us to have for work we'll be doing in the Region over the winter, we'll do our best to accommodate your requests.

Thanks,

Laura Jenkins
